## It's a FAT LOSS PATCH!

Powered by patented  
ForsLean®, ChromeMate®

- ◆ Lose Pounds & Inches
- ◆ Curb Cravings
- ◆ Stop Overeating
- ◆ Activate Fat Burning
- ◆ Boost Energy Levels
- ◆ Preserve Lean Muscle

All Natural  
Completely Safe  
No Ephedra  
Affordable & Simple to Use

Then it's time you use Jen Fe Next, the amazing new FAT LOSS PATCH that's helping thousands gain control of their eating habits once & for all.

This simple dermal application slowly releases the patented ingredients consistently all day, directly into the body. The result is a safe and natural way to restore metabolism, lose weight and inches, reduce body fat and preserve lean body mass.

Suffer no more pills, inconvenient shakes, special foods or deprivation, only to gain it all back in a few months anyway. For less than the cost of one Starbucks Frappuccino a day, you can stick on a daily patch and be on your way to a slimmer, firmer body. When your body replaces fat with lean muscle tissue, the results last. It's that simple!

## WEAR A PATCH LOSE WEIGHT

Transform fat into lean muscle tissue.

# Jen Fe Next Patch Ingredients

The **Jen Fe Next Patch**, new from **Nexagen USA**, is an extraordinary self-adhesive dietary aid featuring a natural blend of **ForsLean®**, **Guarana** and **ChromeMate™**. This high-performing formula slowly releases into the skin to gently stimulate your body's metabolism. The result is a safe and easy way for you to increase your energy levels and maintain a healthy bodyweight.

**ForsLean®**, an extract of the herb *Coleus Forskohlii*, contains the active ingredient forskolin (force-KOH-lin). Forskolin mobilizes fat and stimulates the thyroid, just like the popular diet aid ephedra. However, forskolin **does not** have ephedra's potentially dangerous effects such as nervousness, jitters, heart palpitations and increased blood pressure. Critical studies of forskolin are also revealing cardiac (heart), respiratory (lung) and circulatory (blood pressure) health benefits.

As the body ages, it loses its sensitivity to stimulating substances. Forskolin, though, has been shown to reverse this loss of sensitivity, restoring the youthful responsiveness of fat cells. This is a definite advantage for people over age 40 for whom diets and diet pills have become less effective.

Forskolin has been shown to preserve lean body mass during weight loss programs. This is significant, since it is known that much of the weight lost during dieting is often the lean tissue — the muscle tissue that gives the body shapeliness and that burns calories. The loss of lean muscle during dieting the primary reason why dieters often end up in worse shape, even though total body weight is lower. Read more benefits of forslean at: [www.forslean.com](http://www.forslean.com).

**ChromeMate™ (Chromium Polynicotinate)**, an effective, natural form of chromium linked with the B-vitamin niacin. An essential trace mineral, Chromium helps the body burn calories, promotes fat and weight loss, and preserves lean tissues. Its primary function is to potentiate the action of insulin, which helps the body regulate sugar metabolism, energy levels, and muscle strength.

By potentiating the action of insulin, Chromium helps the body normalize itself metabolically, and sets the stage for significant and enduring weight loss. Most Americans who eat too much refined carbohydrate and fat develop a condition ("hyperinsulinemia") which sends calories to fat cells for storage instead of to muscle cells for energy production. Not only does this condition cause the body to store calories as fat, it also increases harmful fats and cholesterol in the blood...which can cause blood sugar abnormalities leading to diabetes.

**ChromeMate®**, when combined with a healthy diet and even moderate exercise, helps to reverse all this by restoring normal insulin levels and insulin action. With enough ChromeMate, the body can send calories to the "right places" again, and help the body stay in fat-burning mode. ChromeMate also helps balance blood sugar — whether too high or too low — and keeps appetite in check.

**Guarana (Paullinia Cupana)** is a safe, natural source of the energizing, fat-mobilizing substance, caffeine. Caffeine helps the body move fat out of storage and into the blood where it can serve as a source of energy. Using fat for energy spares the sugar in muscles and liver, and it helps keep up muscle strength and endurance during dieting. Guarana triggers the body to burn calories and unwanted fat cells through the thermogenic process. Guarana helps prevent fatigue and the break down of lactic acid from muscle stress.

Guarana contains mild **natural** caffeine from the plant source (no more than in 1 cup of tea ingested over 24 hours) and is accompanied by antioxidants that provide many health benefits. Caffeine helps increase epinephrine (adrenalin) levels in the blood, which boosts attention, alertness, blood sugar and energy, while damping appetite. Aside from caffeine, Guarana is a rich source of the health-protecting substances epicatechin and proanthocyanidins.

The Jen Fe Next Patch also contains **Cosmoperine®** (tetrahydropiperine) to enhance delivery of active compounds and assure the ultimate in patch performance. When used in conjunction with a healthy diet and moderate exercise, all of these ingredients help you to shed unwanted pounds safely and effectively.

**Thyroidinum 30C-** a homeopathic extract designed to stimulate a sluggish metabolism.

**Exactly how do these key ingredients play such a role in weight management?  
It's simple. Each one directly and naturally promotes calorie burning and fat breakdown**

# What does the fat loss patch do?

**Nexagen USA** is a dynamic company dedicated to bringing today's health-conscious consumers the most superior wellness products. Nexagen USA's Research and Development team designs formulations based on scientifically verified, uniquely effective, all-natural ingredients, along with leading-edge delivery technologies. The **Jen Fe Next Patch** formulation consists of a delicate balance of key ingredients, which have been carefully selected, for maximum efficacy and safety. The **Jen Fe Next Fat Loss Patch** is an extraordinary self-adhesive dietary aid featuring a natural blend of **Forslean®**, **Chromate™**, **Guarana**, and **Cosmoperine®**. The high-performing formula slowly releases into the skin to gently stimulate your body's metabolism. The result is a safe and easy way for you to increase your energy levels and attain a healthy body weight.

## The Jen Fe Next Patch is designed to:

- Decrease appetite so you gain control of your eating habits and you stop overeating!
- Curb cravings for sweets and carbs and stop "snack attacks".
- Activate Fat Burning rather than fat storage, resulting in pounds and inches lost.
- Preserve Lean Muscle which is essential to long term weight management.
- Enhance Energy levels and increase stamina without dangerous side effects such as nervousness, jitters, heart palpitations, and increased blood pressure which was caused by Ephedra products.

**ForsLean® was voted "Best New Product of 2001"**

**Visit [www.Forslean.com](http://www.Forslean.com)**

- Reduces body fat and preserves lean body mass (muscle, tissues, organs, etc).
- Promotes weight and inch loss by mobilizing fat to be burned again for energy rather than being stored.
- Enhances metabolism naturally and restores the youthful responsiveness of fat cells... an advantage to those over 40 who notice diets and diet pills are no longer effective.

**Preserving lean body mass is vital to long-term weight management success.** On most weight loss programs, fat and lean muscle are lost. Lean muscle is the mechanism that burns calories. You do not want to lose lean muscle when dieting or you will gain the weight back again. With this Fat Loss Patch you **lose fat, not lean muscle!**

**ChromeMate,™** (chromium polynicotinate) is an effective, natural form of chromium. An essential trace mineral, chromium helps regulate blood sugar levels, helps the body stay in a fat burning mode, helps control appetite and cravings, promotes fat and weight loss, and preserves lean tissue.

**Guarana** is the natural form of caffeine that potentiates the action of Forslean, mobilizes fat, decreases fatigue, increases mental alertness, and decreases appetite. The amount is equal to that in 1 glass of tea consumed over a 24 hour period.

**Cosmoperine®** (tetrahydropiperine) enhances delivery/absorption of ingredients to assure the ultimate in patch performance.

**Thyroidinum 30C** – a homeopathic extract designed to stimulate a sluggish metabolism.

## **Using Our Jen Fe Next Patch is EASY - This unique Patch puts YOU back in control of your eating habits!**

Just peel and stick a patch on a lean, clean area of the body. Alternate areas. Replace every 24 hours. It's that simple. No more pills, inconvenient shakes, special foods or deprivation. The benefits of the patch increase the longer you wear it. With the new discipline and control provided by the patch, people are able to incorporate healthier food choices. With the increased energy, exercise is encouraged. Moderate exercise enhances weight loss and increases overall health. The patch contains no dangerous stimulants...No Ephedra. Wear the patch in a lean area such as your forearm as a reminder of your goals.

## Most frequently asked questions

**How does the Patch work?** Using all natural ingredients, including the key patented ones ForsLean® and ChromeMate®, this **Fat Loss Patch** promotes weight/fat loss while maintaining lean muscle mass. Preserving lean muscle mass during weight loss is essential to long term success. Why? Because lean muscle is where calories are burned! Lean muscle also defines the body's shape. This dermal application gently delivers the herbs consistently, preventing side effects such as nervousness, jitters, heart palpitations, and increased blood pressure often experienced with other stimulant products. When absorbed directly through your skin, these ingredients stimulate your own body's natural metabolism and move fat out of storage to be burned again for energy. The ingredients are time released over a 24-hour period, allowing you to stay in control of your appetite.

**How soon before I'll see results?** It varies from person to person due to individual body composition, metabolic rate, amount of weight to lose, etc. Many begin to see results within the 1st week, although for others it may take up to 4 weeks to see noticeable results. Be patient and pay special attention to inch loss versus pounds lost. Look at this as a 90-day program to experience the full benefits of this unique & cutting edge product.

**Is wearing the Patch for weight management as simple as it appears?** Yes. Just peel and patch on a new one each day until you achieve the results you seek. It's that simple!

**How is Jen Fe Next Patch different from all other dietary patches?** It contains exclusive, patented ingredients and unlike other similar products, all the ingredients are known weight management and/or metabolic impact food supplements. These food sources are all-natural herbal extracts carefully blended scientifically into our metered adhesive formulation. Used by the Asian community for centuries as dietary aids, these wonderful gifts from nature work perfectly when combined with an all-natural surfactant, which breaks down the surface tension of water and natural skin oils. In essence, these specifically selected surfactants open the dermal gate, allowing deep penetration and bio-availability of our unique ingredients immediately.

**Where do I wear the patch?** Wear the patch on a clean, dry, lean area (such as forearm, shoulder, upper back, shin, ball of foot, upper chest) where it will have good contact with a leaner area of your skin. We recommend wearing it someplace visible, like on your forearm, as a reminder of the goal you are trying to accomplish.

**How do I apply the patch?** Simply clean and dry a lean area of skin, peel off the backing, and firmly press the adhesive side onto the prepared area. Leave it on for 24 hours. Replace with a new patch in a different area each day until you reach your desired results. Combine the patch with a healthy diet and regular exercise to obtain maximum benefits. Continue to use as needed to maintain your results. It's that simple! Now you can break the yo-yo diet cycle and lose unhealthy weight and inches for the last time!

**Do you have other products to enhance weight loss?** Yes. To complement the patch for those with a great amount of weight/fat to lose and for those with stubborn weight/fat to lose, we recommend adding the **Fat Burn Excelsior Next**, **Cortera Xcel**, **Energy Dynamix II** and/or the **Cell Energy Elixir** (<http://www.nexagenusa.com/deborahdotk>).

**Is there a special diet to follow?** No. We recommend that you begin a program of sensible food choices and some regular exercise to support and enhance the effects of the **Fat Loss Patch**. As a guideline, you will receive the **16 Keys to a Healthy and Fit Lifestyle** with your patches.

**What if I am taking other medications?** This **Fat Loss Patch** is safe but if you are under a physician's care or have questions, consult your physician before beginning any weight loss program. Be sure to give your physician the list of ingredients and ask your physician to research them. A good reference is **www.forslean.com**.

**Does it cause skin irritation?** Not usually. If you have extremely sensitive skin, wear the patch on your shoulder blade, shin, or ankle. Alternate areas each day.

**Is it approved by the FDA?** The FDA doesn't approve or disapprove nutritional supplements. The ingredients in the **Fat Loss Patch** are all on the FDA's "G.R.A.S." list. (Generally Recognized As Safe).

## Jen Fe Next Patch Testimonies

I personally think obesity is the single biggest medical problem we have. I am excited about Nexagen's product line because it really hits every area that the patient has concerns about. These products address the same part of the metabolic cycle that ephedra did to stimulate the system to break down fat and to maintain lean body mass. But (in contrast to ephedra), Nexagen does it with safe, natural ingredients. A lot of time and effort has obviously been put into this to create something that I think is a great product. **I lost 10 lbs. I wasn't really that overweight, but I lost those last 10 pounds I was trying to lose in about six weeks.** I also had my teenage daughter try it. I saw her lose five pounds over the course of about a month.

**Dr. Andrew Ordon, MD, FAC (Beverly Hills)**

**After wearing the patches just over three weeks,** I went to the local Casual Male big and tall store to pick up a couple of shirts I had in layaway. Just before they rang up the sale, I told the cashier that I was wearing these fat loss patches and better try the shirts on again before I left the store. The 5X shirts that fit me less than 30 days before just hung on me . . . Looked like I was a kid wearing his dad's clothes! We exchanged those shirts for the same styled shirts sized 3X. I've lost more than 5 inches in my waist and just had two links taken out of my watch to keep it from falling off.

**Chris D. (Tulsa, OK)**

**I lost 36 pounds of fat in 17 weeks** wearing this Patch. With no dieting and no exercise at all, my waist is down 8½ inches! I have to stop halfway through my plate because I'm full! I don't crave sweets anymore and my joints don't ache like they used to. I've got more energy. But it's not the jittery, nervous kind. I just feel better! I'm sleeping better and I wake up alert and ready to take on the day. This unique Patch is safe, affordable and IT WORKS! The market demand is incredible.

**Rebecca E. (Memphis, TN)**

As a Certified Personal Trainer, All American Decathlete from Georgia Tech, and Manager of 2 GNC Stores, I work with clients everyday setting up diet & exercise programs for people who are trying to achieve a healthier body & lifestyle. Because I've worn the Patch (and lost 5 ½ lbs in my first 10 days), I am now introducing it to all my clients. Many of them find it hard to stay on the strict diet and exercise program we give them, so I have incorporated the Patch into their program. **I'm seeing an average result of 7 to 8 lbs in 2 -3 weeks with most of my clients. For those not totally following the program, I'm still seeing an average reduction of 5 lbs in 2 -3 weeks.** My clients are enjoying this Patch!

**Scott C. (Atlanta, GA)**

I've been a type 2 diabetic for the last six years. When I lost my first 16 pounds on the Patch, my insulin started to level out and my doctor told me I could stop taking insulin altogether. Talk about a life-changing event! I was taking five shots of insulin a day! While I am still a diabetic and continue to monitor my insulin, it is still level, probably due to my weight loss. All my friends have watched me lose weight and now they're using the Patch too. I've **lost 30 pounds** and went from a pants size 20 to a size 6. Needless to say, this Patch has worked wonders for me and has given me a new lease on life!

**Shannon M. (Tacoma, WA)**

I have been using the patch for 9 months. The 1st month, I was convinced that the only way it was going to work for me, was to put it over my mouth! Then it slowly started to curb my appetite in the 2nd month. **I have lost 64 pounds to date,** with about 16 more to go. The only challenge I faced was to use a little restraint to STOP eating when I was full. I was used to over-eating until I was miserable. Now it seems I just CAN'T over-eat any more. In times of stress, I tend to eat more than I should. When I have those days, I put on 2 patches & that works for me.

**Sherry O. ( FL)**

**I've lost 39 pounds and three chins in 4 months.** People ask me about the Patch all the time. It's something people want, and they want it now! I'm saving money buying it wholesale; my friends are saving money buying it wholesale; and the company keeps sending me money because I told my friends about it!

**Martha M. (Lakeland, TN)**

## **Epidemic of Obesity - 63% of Americans need this product!**

Being overweight or obese causes 300,000 deaths a year and quadruples chance of getting heart disease, diabetes, and certain cancers! It is now the **#2 cause of preventable death** (following tobacco). Experts estimate that **6,000 people die daily** from complications caused by being overweight. 165 million Americans are on a diet and \$110 million is spent daily on weight loss products!

### **Want to Make a Difference?**

Help suffering people? Help the 3 out of 5 Americans who suffer from being overweight with a product that can truly change their lives and yours too. Do you know someone who wants to lose weight or who suffers from weight-related illnesses?

Studies show that obesity is epidemic, and wellness products are forecast to become a trillion-dollar industry. You can help your family and friends with their weight and weight-related challenges by telling others about the patch. Help them become healthier.

Many weight-challenged people desperately need help and they are ashamed to ask for it, so please don't keep it a secret. We want to safely help improve the quality of people's lives. So whether you are interested in just using the patch yourself or becoming a distributor and sharing it with others, we welcome hearing from you.
